VALENCIA MAKER TOOLS

FREE 2-MINUTE CHECK

Price your handmade products with your real costs in mind.

Before the next craft fair, check materials, time, overhead and fees - not just the price of supplies.

NO ACCOUNT NEEDED

ILLUSTRATIVE EXAMPLE

1 Build your full cost per item

Materials	**$3.00**
Packaging	**$1.00**
Making time: 15 min × $20/hour	**$5.00**
Allocated overhead	**$1.00**
Fixed selling fee: $0.30 per order ÷ 1 item	**$0.30**

MODELED FULL COST PER ITEM **$10.30**

2 Compare the price you actually charge

Assume a 3% percentage fee and 30% target margin. The rounded-up modeled minimum selling price is $15.38.

IF YOU CHARGE

$12.00

$1.34

MODELED PROFIT

IF YOU CHARGE

$16.00

$5.22

MODELED PROFIT

Same item, same costs, different price. These are modeled per-item figures, not real customer earnings.

TRY IT WITH YOUR OWN NUMBERS

PRINT OR FILL BY HAND

Use the same currency for every field. Leave out sales tax collected on behalf of a tax authority; this is not tax advice.

Materials / item

_____

Packaging / item

_____

Making minutes

_____

Value of time / hour

_____

Overhead allocated / item

_____

Fixed selling fee / order

_____

Units per order

_____

Percentage selling fee

_____

Target margin

_____

Chosen selling price

_____

3 Check the math

Full cost = materials + packaging + (minutes × hourly value ÷ 60) + overhead + (fixed fee ÷ units per order).

Minimum price = full cost ÷ (1 − fee rate − target margin); round UP to the next cent.

Common traps before your next market

- Forgetting to count your time as a cost.
- Confusing a 30% markup with a 30% profit margin.
- Using the same fee twice - once in overhead and once as a fixed fee.
- Assuming your model includes live marketplace rates, taxes or future sales.

Check up to 60 products in one Excel file.
